

6118 - He is being taught by a female teacher - what should he do?

the question

I
am a high school student and my question is: What can I do about the women
at my school? They are my teachers and class mates and I have to talk to
them and look at them.

Detailed answer

We
put this question **{(What
should medical students do in lectures given by female teachers?)}**.

) to Shaykh 'Abd-Allaah ibn Jibreel (may Allaah
preserve him), who replied as follows:

People
like these students have no other option, so they have to try hard to
lower their gaze, protect themselves and keep away from temptation which
could lead them into haraam actions. If he notices that he is starting to
slip towards something haraam, he should stop attending the lecture.

And Allaah is the
Source of strength.
