

## **72366 - He wants the names of books that deal with solving social problems**

---

### **the question**

I would like to specialize in the field of solving social problems – on the basis of the Quran and Sunnah, of course – what are the books that I should study?.

### **Detailed answer**

There are many social problems, some of which have to do with husbands, wives, youth, girls, women and the family in general.

Our brother has done well to ask about books that deal with solving these problems in accordance with the Quran and Sunnah, because there is no better way of solving them than relying on the Revelation of Allah Who created mankind and knows what is best for them, so He has guided them to it and warned them against what is harmful for them.
